### Savings Bank Department.

Deposits received and interest allowed at  
3 per cent. per annum, compounded half  
yearly.

Farmers' Sale Notes negotiated.

General Banking Business.

STUART STRATHY MANAGER.

### County Council.

The County Council assembled at  
2 p.m., Monday, the Warden, Mr.  
Wiley, in the chair, and all the mem-  
bers present.

These resolutions were passed:

Moved by Messrs. Clark and Gor-  
ing, that Messrs. Evans, Ness, St. Onge  
and Calder be a Committee to inter-  
view the St. Catharines City Council  
re the adjustment of premiums on the  
insurance of the County Buildings.

Moved by Messrs. Ness and Gor-  
ing, that the Auditor's report be adopt-  
ed, and the auditors be paid \$50 each.

Moved by Messrs. Goring and Strong,  
that this Council appoint a Committee  
to interview the St. Catharines City

Council in regard to the dangerous  
condition of the bridges on the Queen-  
ston Road over the N. C. R. and G.  
T. R. tracks, with a view to having  
the bridges put in a safer condition,

and the Committee to consist of Messrs.  
Goring, Ness and Moyer.

Council then adjourned.

The County Council spent Tuesday  
morning visiting the Industrial home  
and Jail, both of which were found in  
good condition.

In the afternoon the Council met,  
that the usual grant to the General  
and Marine Hospital be increased this  
year.

Secretary Eastman of the Smithville  
High School Board notified the Council  
that a deputation would wait on the  
Council on Thursday.

A letter was received from the Agri-  
cultural College to the effect that there  
was a vacancy in the college from this  
time of attendance should be reduced  
to one year under certain conditions.

The insurance on the County Build-  
ings came up again.

Mr. Moyer thought there should be  
no difficulty in the matter. There  
was an agreement between the city  
and county, and if the city would not  
stand to the agreement there was only  
one thing to do.

Council then adjourned to meet the  
Finance Committee of the City Council,

### BITTER CREAM.

How Poor Facilities May Undo Good  
Instincts.

How shall we keep cream from get-  
ting bitter in winter? Mainly by pre-  
venting its suffering from the effects of  
the prevailing low temperature. Milk  
or cream does not get bitter when it is  
maturing naturally at a proper temper-  
ature, says The American Agriculturist.  
Butter with a bitter flavor, coming  
from small home producers, is of fre-  
quent occurrence. It is usually from  
farms where the housewife with poor  
facilities but good dairy instincts re-  
fuses from getting her milk in the hot  
kitchen pantry and puts it in a room  
far too cold for it. In the latter place,  
where the temperature is usually a lit-  
tle above freezing, the milk will remain  
sweet for several days, tardily casting  
up its cream and then without any  
acidity developing, a fermentative  
change takes place resulting in the char-  
acteristic bitter flavor.

The natural end of healthy milk is  
to sour in at the most from two to  
three days. Before the limit of that  
time, in from 24 to 36 hours, and while  
the milk is perfectly sweet the butter  
fat should all be extracted therefrom  
and stored in a separate vessel to ma-  
ture. I think it better that the ripened  
cream be churned in 18 hours after  
skimming, or at least in 18 hours after  
the longest. I mean by this that the  
cream should be kept at a warm enough  
temperature to ripen within that period,  
so as to be fitted for churning. To avoid  
any bitter fermentation during cold  
weather milk should be set for cream-  
ing in an apartment having a uniform  
temperature of 50 degrees. Then, the  
milk being skimmed within 24 or 36  
hours, the cream should be matured at  
40 degrees.

Avoid the hot kitchen pantry with  
its mixed odors of cookery on one hand  
and a cold room on the other. The at-  
mosphere of the dairy room must be  
pure as well as of a mild, equable tem-  
perature, or foreign flavors will displace  
the natural one in the butter.

The housewife who wishes to make a few  
pounds of butter per week throughout  
the winter and can find a ready sale for  
it at a maximum price should carefully  
observe the above principles. Another  
thing, most small winter butter makers  
do not color their product uniformly.  
The average consumer, although he  
is fully aware that the butter he is eat-  
ing is artificially colored, likes to see it  
to have it so, which proves how much  
the eye acts as a guide to the palate.  
The worst mistake is in coloring the  
butter too highly, which is almost as  
bad as not coloring it enough. A happy  
medium is in striking a shade of the  
natural color of the June product.  
With small makers this compels the  
greatest accuracy in measurement and  
the employment of a perfectly reliable  
brand of butter color.

To Cure a Cold in One Day.  
Take Laxative Brown Quinine Tab-  
lets. All druggists refund the money  
if it fails to cure. 25¢.

### Big Waste.

Edward Atkinson makes a very sharp  
remark when, in writing about the  
fearful waste of both skimmilk and  
cornstalks, he says in effect that he  
does not know much about farming,  
but when he sees this waste going on  
all because of the ignorance of men he  
has a right to conclude that the aver-  
age farmer himself really knows but  
little of farming. Little as Mr. Atkin-  
son knows, remarks Board's Dairyman,  
he knows enough to see this big waste,  
whereas he talks with lots of farmers  
who don't know it, nor can they see it.  
Pope says something about familiarity  
breeding contempt. Is that not the se-  
cret of this matter? So many farmers  
have for so long a time been accus-  
ted to this wasteful way of handling  
cornstalks and skimmilk that they  
really cannot see the wastefulness of it.  
But Mr. Atkinson is right, clear away  
right, when he speaks of this fearful  
waste. Let it be remembered always  
that 40 per cent of the combined value  
of the corn plant is in the stalk. Let  
every farmer take that fact as his guide  
and then so shape his farm methods,  
feeding methods and all methods as  
to save all of that waste possible. Let  
him also remember that 40 per cent has  
been once earned by his own expendi-  
ture for labor, and he must pay for the  
growing of it. If he wastes 40 per cent  
of what he earns, the responsibility  
rests on him and not on Providence. A  
full study and consideration of that  
out into better and more saving meth-  
ods if he will but follow its teachings.

### Commercial Dairying.

If the dairy farmer is located near a  
village or city, many times it will pay  
to establish a milk route, writes F. W.  
Massey in The Western Agricultural.  
In some instances cream can be sold  
and to soda fountain proprietors. If  
such openings have already been taken,  
doubtless the next best thing to be done,  
as a rule, will be to make strictly first  
class butter and seek private customers  
for it in the surrounding village or city. Such  
customers, once secured, are easily held,  
if butter is kept up to a high standard  
of excellence. Ascertain the amount  
wanted by each customer and deliver  
on a certain day each week. The deliv-  
ery of butter to private customers af-  
fords opportunities for selling other  
farm and garden products, including  
poultry, eggs and byproducts of the  
dairy — cottage cheese, for instance,  
which some dairymen make from their  
skimmilk. A dairymen living quite a  
distance from town would not often do-  
well to establish or buy a milk route;  
hence the decision has to be made as to  
whether it will be better and more  
profitable to make the milk up at home  
or send it, or the cream, to the public  
cremery, or the milk to a cheese factory,  
provided one or both of those la-  
borious institutions are convenient. There are, no  
doubt, times and locations when, and  
where it may be better to patronize a  
cremery or cheese factory in prefer-  
ence to making up milk at home.

Established  
1843.

### Hardy Blackberries.

Blackberries found most hardy at the  
Ohio station are Early King, Snyder,  
El Dorado and Ancient Briton. Early  
King is the earliest of any hardy kind,  
being nearly equal to the Snyder in  
hardiness and about two weeks earlier.  
El Dorado is the largest of the hardy  
sorts and the best in quality, while the  
Snyder seems still to hold first place as  
to productiveness. Erie and Ohme are  
excellent varieties, but not perfectly  
hardy. Rathburn is promising, although  
it has not been fully tested as to hardi-  
ness.

### Rudbeckia Golden Glow.

A hardy perennial that can never be  
overpraised is the grand new plant  
Rudbeckia Golden Glow. This is one of  
the most decorative of our summer  
blooming plants. It grows to a great  
height and nearly all summer is covered  
with its double golden yellow flowers,  
very much like chrysanthemums.  
These are borne on long, wiry stems,  
thus making them fine for cutting. The  
plant delights in a sunny, open situa-  
tion, and will absorb a great amount of  
water, says Vick.

## I. WHITTAKER Grimsby

Thursday, June 8

Grimsby.

Mrs. W. Haist, is visiting her sister in Buffalo.

Mrs. Rachel Upper wishes to announce that after June 10th she will be up a music class.

J. Thompson, of St. Thomas, spent last week visiting with his sisters, Mrs. R. L. Gibson, Mrs. Jas. Doree and Mrs. W. W. Benner.

Miss Menck, of Peterboro, is staying with Mrs. Mansur. Miss Woolverton, of Hamilton, spent a day with Miss Mansur last.

A New Club.—The Amateur Photographers of Grimsby have formed a club to be known as the Grimsby Kodak Club. Mr. Curphy is one of the leading spirits.

Earl N. Weaver, the crack banjo player of Canada, will render four popular selections at the band concert at Grimsby Driving Park on next Friday night. Admission only 10 cents.

The Gov. General's Body Guard under command of Col. Denison, camped in Victoria Park from 11 a.m. to 4 p.m. Wednesday. They were about 230 strong and were a fine body of men and horses.

Come and hear the band at Grimsby Driving Park next Friday evening and enjoy a good program of music and have a dish of ice cream. admission only 10 cents Grandstand free.

Wm. Zimmerman and Chas. Elliott, of Jordan, wheeled to Grimsby Sunday last and spent an hour or so enjoying the balmy breezes that salt off old Ontario for the benefit of visitors.

Service will be given by steamboat between Park and Toronto and Park and Jordan. The Navigation Line will issue of two trips each way full particulars see the in this paper or consult the at, S. A. Whittaker.

R. M. Hazelwood, of Clifford, is spending a few days with A. F. and Mrs. Hawke.

Don't forget the band concert at the Driving Park Friday evening at 8.30. Admission 10 cents.

For Sale—Potatoes—White Elophanta, Empire State, Pride of Monroe County. Apply to W. D. Kitchen, North Grimsby.

For Sale—A flock of high bred Shropshire Down sheep, 16 ewes and 10 lambs. Apply at once to A. F. Carpenter, Winona.

W. L. Wolverton, L. D. S., has removed his office to Depot street, opposite the town hall, where he will be pleased to see any one wishing to have their teeth attended to.

The annual church service of the C. O. P. will be held in the Baptist church, Grimsby, on Sunday, June 11th, at 7 p.m. The Brethren are requested to meet at the hall at 6.20. Dave Allan, C. R.

The Ladies' Aid of the Methodist church, Grimsby, will give their monthly At Home on Thursday evening, June 8th, in the school room. Tea served from 5.30 until 8. Admission 10 cents.

Mr. Knox has been promoted to the position of teller in the Bank of Hamilton here, in the place of A. W. Neiles, promoted to Milton. Harry Grout takes the position formerly occupied by Mr. Knox.

Next Sabbath will be Flower Sunday in the Methodist church. At 11 o'clock Rev. Wray R. Smith will give an address fitting to the occasion. The Sunday School will meet in the school room not later than 10.45 a.m.

G. W. Hunt, the big commission man, of Ottawa, paid Grimsby a visit last week and appointed A. Barland his agent here. Mr. Hunt does a strictly commission business and gives his customers the very best satisfaction. See advt.

Don't forget the sale of the 10-acre fruit farm on Saturday, June 10, at the Lincoln House at 3 p.m. The property to be offered belongs to Mrs. J. B. Moore and will be sold to the highest bidder. Terms easy. Jas. A. Livingston, auctioneer.

Ho! For the Grimsby Roller Mills. We are leading in the business and are now prepared to do all kinds of work in our line. Fine chopping a specialty. In grating we guarantee satisfaction. Give us a trial. Full line of feed on hand at lowest cash prices.

Evan's Electric Sprayer—No farmer or fruit grower should be without one. A pair of diluted paris green will, when applied with this sprayer, cover two acres of potatoes. For sale by J. W. Unwin, Grimsby. Also paris green and Excelsior potato bug killer. Axle grease 5 cents a box.

Children's day will be celebrated in the Methodist church on Sunday. In the morning an object sermon will be preached to the children and the members of the Sunday School. In the evening the subject will be "The Way to the City of Child Soul." The pastor, Rev. Wray R. Smith will be in charge of the services.

Millinery at Cost—Beginning Thursday morning, June 8th, I will offer all my stock of spring and summer millinery at and below cost. This sale is made in order to clear out all the spring goods, and will continue for three days, closing Saturday night at 10 o'clock. If you want a bargain come right along. Miss Etta Coon, over Smith's store.

Further particulars have arrived with regard to the injury done Henry Burns at Buffalo. It appears he was working in an elevator. He, with some other men, were holding a rope. When the order was given to let go, Burns held on and was drawn into the machinery. Both hands were so injured that amputation was necessary. Strange to say, both thumbs escaped injury.

A. E. Pilkey, representing John Caldwell & Co., commission merchants 171 to 175 McGill St., Montreal, has been spending a week or two in this section on a business trip in the interest of his firm. Bert is pretty well known throughout the country as he is one of the fastest skaters in the Dominion. While here he called on a great number of fruit growers and made arrangements for having fruit shipped to his firm.

Horin & Cassell, boot and shoe dealers, Hamilton, have started a big unloading sale, which will make trade hum with them judging by the prices they are selling at. This firm is known for their upright dealings, and customers can depend on getting their wants supplied in the shoe line at prices that will pay them to drive miles to secure. This store is at 38 King St. West. Look out for prices in their advertisement next week.

Service will be given by steamboat between Park and Toronto and Park and Jordan. The Navigation Line will issue of two trips each way full particulars see the in this paper or consult the at, S. A. Whittaker.

### EXCURSION TO GUELPH.

The annual excursion of the Lincoln Farmers' Institute, to the Ontario Model Farm, Guelph, will take place all along the line of the Grand Trunk from Niagara Falls to Grimsby, on Wednesday, June 14, 1893. Extensive preparations are being made by the committee to take care of the people.

### TIME TABLE AND FARES.

Leave	Fare round trip
Jordan, 7.30 a.m.....	\$1.00
Beamsville 7.40 a.m.....	95
Guelph 7.45 a.m.....	95
Returning, the train will leave Guelph at 5.30 p.m. Tickets good on all regular trains next day.	

Jesse Pawling, Sec'y,  
St. Catharines.

### Dollared the Horse

Hugh Vosburgh, of Beamsville, was a mad man on Tuesday evening. He has been delivering goods to the cattlers at Grimsby Park for Hagar & Hall, Beamsville. Tuesday evening when he went to leave the Park at 6 o'clock he found the gate shut. The caretaker demanded 20 cents for each day that Vosburgh had delivered goods, this amount being equal to the market fee. Vosburgh refused to pay for the days gone by but tendered the money for Tuesday. This was accepted, but the gate was still kept shut until Vosburgh would settle for the previous days. This he would not do and left the Park, leaving the horse and rig on the inside. He came to Grimsby and interviewed Police Magistrate Forbes. Armed with a letter he returned to Grimsby Park and upon payment of the back fees got his horse. This is a funny, funny world.

### The Next Band Concert.

The Citizens' Band are making heroic efforts to pay their teacher and supply the public with good cheap music. To do this they must have a little money, and in order to get it they give an occasional concert to which they make a small charge. The next concert will be given on the Driving Park on Friday evening next at 8.30 o'clock. They have secured the services of Earl N. Weaver, the best banjo player in Canada, who will render four selections, assisted on the piano by his brother, Fred Weaver. To hear Weaver play one selection is worth double the admission fee. Refreshments will be served on the grounds by Culp Bros. Admission 10 cents, children 5 cents. Grand stand free. Come and help the band boys along. Tickets may be secured from A. Bourne, Sec'y.

Thursday, June 8

### Beamsville.

W. Simpson, of Welland, spent Sunday at home.

Miss Ethel Simpson has returned from a trip to Welland.

Harry Durt, of Mount Pleasant, is here visiting Mrs. Ker.

Mr. and Mrs. A. J. Gibson have returned from a trip to Brantford and other points.

Our baseball boys are trying to arrange a match with Grimsby for Wednesday, June 14th. We have the only team on earth that can play baseball without practicing.

A game of lacrosse was played here on Saturday last between Merriton and the home team. Result—Merriton 5, Beamsville 2. Better luck next time boys.

At the Band Concert at Grimsby Driving Park next Friday night, Earl N. Weaver, Canada's premier banjo player, will give several selections. He is worth going to hear. A car east at 10.15.

Reeve Beatty intends that Beamsville shall have a monster demonstration here on July 1st. A meeting to start the ball rolling will be held Thursday night, 8th of June.

### No Right to Ugliness.

The woman who is lovely in face, form and temper will always have friends, but one who would be attractive must keep her health. If she is weak, sickly and ill run down, she will be nervous and irritable. If she has constipation or kidney trouble, her impure blood will cause pimples, blotches, skin eruptions and a wretched complexion. Electric Bitters is the best medicine in the world to regulate stomach, liver and kidneys and to purify the blood. It gives strong nerves, bright eyes, smooth, velvety skin, rich complexion. It will make a good-looking, charming woman of a run-down invalid. Only 50¢, at any drug store.

Sold by Murray Fitch, Grimsby.

### County Council

(Continued from Page 4.)

As a deputation opposed to the by-law had not arrived, the council adjourned to allow the Q. & G. Committee to get to work, and will meet this afternoon at 2 o'clock.

R. B. Sharpe, J. T. Taylor and R. J. Adams, of Caistor, were present to oppose the by-laws. The absentee is Frederick Dennis.

Several deputations were heard at Thursday afternoon's session of the County Council. The opening of a new road and closing of an old one near Caistorville was discussed, both sides being heard.

Reeve Lymburner of Caistor and Ex-Warden Jackson addressed the Council, asking that by-laws of the township Council be confirmed. They pointed out that by opening the new road a great expenditure would be saved. It would not be necessary for the municipality to build and maintain a new bridge.

Against the confirmation of the by-laws Messrs. Taylor, Adams, Sharpe and Dennis spoke. The new road did not serve the purpose of the people directly interested, while the bridge is what they wanted. They contended that the new road was out of the way and increased the distance to the village of Caistorville.

The by-laws were referred to the Committee on Roads and Bridges.

Reeve D. Jackson of South Grimsby addressed the Council, asking for a county grant towards the construction of a new bridge over the "Twenty" at Smithville. He pointed out that if Smithville were an incorporated village the county would assume the bridge.

Smithville being a High School District. While under no legal obligation the County Council is under a moral obligation to construct the bridge. The bridge is used by vehicles of Caistor and Gainsboro ten times to once by the people of South Grimsby.

The matter was referred to the Committee on Roads and Bridges.

C. Fretshaw and Wm. Adams of the Smithville High School Board made a plea for a supplementary grant. Referred to the Committee on Education.

President Robert McLaren, Secretary McIntyre and Mayor Keating of the Board of Trustees of the St. Catharines Hospital made a strong plea for an increased grant to the hospital. They pointed out the great expense of management, and the benefit of such an institution to the people of the country. The delegation were not aware at the time that the Council had decided to increase the grant to the hospital this year from \$500 to \$600, but owing to the strong representations made it is quite possible that they may still further increase the grant.

Col. Cruickshank of the 44th, and Maj. Hiscott asked for a grant to the two Companies of the 19th attached to the 44th to help pay for helmets for the Battalion.

After hearing all these deputations the Council adjourned.

Council met Friday at the usual hour.

A resolution was passed, granting the clerk and treasurer one month's leave of absence, and the caretaker two weeks.

At the County Council on Saturday several reports were presented. The Committee on Roads and Bridges reported that the Robbins bridge and the Laird bridge have been repaired and the Wellandport and Port Dalhousie bridges painted, and that the County of Lincoln would pay a proportion of the cost with the County of Welland. The committee recommended that the by-laws of the Township of Caistor be confirmed, and that the request of South Grimsby for a grant to assist in building a bridge over the 20-Mile creek in Smithville be not entertained.

Mr. Goring presented a report of the Industrial Home committee, making various recommendations already reported.

Mr. Calder, for the Education committee, reported, recommending that \$150 be granted to the Beamsville Model School; that \$55 be apportioned to pay for Model School examinations; that \$25 be paid to the President of the County Teachers' Institute; that the grants to High Schools and Collegiate Institute be in accordance with the finding of Judge Senkler in August, 1887; that \$500 be granted to the Niagara, Beamsville, Smithville and Grimsby High Schools for repairs, providing that the St. Catharines Collegiate Institute does not make a demand for a proportionate grant.

Mr. Ness, for the Printing and Building Committee, reported, recommending that the account for work and supplies be paid by the Finance Committee; that the tender of H. M.

Rogers for supplying coal at \$4.59 a ton be accepted; that F. A. Goring, the Warden and Chairman be a committee to confer with the City Council with a view to repairing the walls of the jail yard; that the boiler and heating pipes in the City Buildings be repaired, and that a new flag be purchased and a small storm flag for bad weather, such flags not to be loaned to any party.

A report of the Special Committee re the Queenston street bridge, signed by Ald. Beattie and D. H. Moyer, was adopted.

Mr. Moyer, for the Queenston and Grimsby Committee, reported on the condition of that road, recommending the purchase of two road graders.

The Council conformed the road by-laws of Caistor township.

A by-law was passed to regulate the fees of the Sheriff for attending High Court.

Messrs. Moyer, Evans and Strong were appointed a committee to purchase the road machines for the Q. & G. road.

The Council then adjourned, to meet again on Thursday of this week.

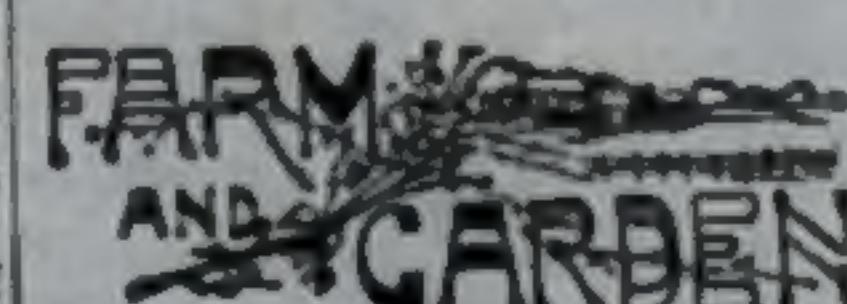

### Public Notice.

A meeting of the citizens of the village of Beamsville will be held in the town hall on Thursday evening, June 8th, at 8 o'clock, for the purpose of putting on a demonstration for July 1st. It is intended to put on a rouser demonstration, to surpass anything ever attempted before.

All the citizens will be expected to take part and appoint a committee to go ahead with the program and push the work as rapidly as possible.

GEO. A. BEATTIE,

Reeve.

### CABBAGE ROOT MAGGOT.

A Sectional Protection Method Used for Large Growers.  
The cabbage root maggot has been the cause of great loss to truckers, destroying annually a large amount not only of cabbage, but of allied plants. The fly which is the source of the trouble deposits its eggs on the ground near to the stalks of cabbage, turnips, radishes, etc., and the larvae, when hatched, in about ten days or less, attack the rootlets and eat partially into the main root. In a sketch of this trouble and methods used to combat it M. Y. Kaine gives the following information in Farm and Fireside:

The best preventive remedy in case of cabbage, kale and similar large plants is tar paper cards fitting closely around the stem. These may be cut from one ply tar paper with the punch shown in Fig. 1. The cutting edges of this tool, each of which is 1½ inches long, are arranged in the shape of half a regular hexagon with one radius.

DEVICE FOR CUTTING STEM CARDS.

which is met at the center by six other cutting edges, each one-third of an inch long. These central cutters are upon a separate piece of steel, so as to be easily removed when sharpening of the blades is necessary. The little cuts allow the cards, when applied to the stem, to fit more closely around it. Fig. 2 shows the manner of striking off cards, the dotted lines indicating where the tool is to be placed again. By having the roll of paper on a horizontal spindle (a broom handle will do), so that the paper may be readily unrolled and drawn across the cutting block below, the cards may be struck off at the rate of about 500 an hour.

When applied to the stem the card must be made to fit snugly, so that the female fly cannot crawl under it to lay her eggs on the ground. They must also be high enough up from the ground to prevent earth being accidentally thrown upon them, else the maggots may work their way into the stems as easily as if they were underground and no cards were used. This method of protection, which, if properly applied, is absolute, costs the large growers of Wisconsin, among whom the practice is common, about \$1 per 1,000 plants.

# Band Concert AND Banjo and Piano Recital

### Ex-Town Treasurer Arrested.

St. Catharines, June 6th.—Owing to an alleged shortage of nearly \$900, Russell Wilkinson, ex-treasurer of the town of Niagara, has been arrested. Wilkinson also held the office of clerk of the town. In 1886 in response to a request, the Ontario Government sent over a municipal auditor, who found that a shortage did exist. A year later another request was made and the result was that the auditor

found that the shortage had considerably increased in the year. In March 1898, Wilkinson left his job. The Municipal audit of 1898 found still another increase in shortage to January 1st, 1899, so that, at the latter time, it amounted to \$888.72.

Wilkinson was brought up before Magistrate Evans and remanded for preliminary hearing until Saturday next. The unfortunate man is unable to secure bail.

JAS. A. LIVINGSTON,  
Publisher, GRIMSBY

THURSDAY, JUNE 8, 1899.

County Council.

(Continued from Page 1.)

in reference to the insurance on the County Buildings.

The council met Wednesday morning, when a communication was read from Jas. Dunlop, stating that his son be appointed a student at the Ontario Agricultural College.

The use of the Court Room was granted to the Grand Division of the Sons of Temperance for their annual gathering on Dec. 5 and 6.

The Committee on Correspondence presented their first report, recommending that a grant of \$600 be made to the Hospital. The communication from Smithville High School was referred to the High School Committee, and the letter of Jas. Dunlop was referred to the Chairman of the Agricultural Committee. The communication of the city council re insurance of county buildings was referred to the Chairman of the Special Committee and the Queenston street bridge was referred to the Chairman of the Q. & G. Stone Road.

The Committee on Assessment reported recommending the assessments be equalized as follows:

Gainsboro .....	\$1,138,012
Calator .....	784,207
North Grimsby .....	608,316
North Grimsby .....	752,906
Clinton .....	1,215,128
Louth .....	1,029,402
Niagara Township .....	1,267,039
Niagara Town .....	326,590
Port Dalhousie .....	150,000
Beamsville .....	143,905
Grimsby .....	166,059
Merritton .....	309,582
Total .....	\$9,245,842

Council then adjourned.

The only business done in open session Wednesday was the reception of a report of Mr. W. H. J. Evans, bearing on the insurance of the County buildings. The report stated that the city of St. Catharines paid their share of the insurance up till 1895, when the award was made by Judge Macdougall, and since that time they have contributed nothing. The conference between the Finance Committee of the City Council and the County Council on Tuesday brought the parties to an agreement, by which the city agreed to pay its share of the insurance, amounting to about \$100.

Messrs. Sheppard, Haynes and Ben net, Superintendents of the Queenston and Grimsby Roads, appeared before the Roads Committee yesterday and made addresses, urging the Council to go into the road making business on a large scale. They asked that machinery be purchased and an appropriation made to rebuild a portion of the Q. & G. Road.

The councillors listened to their remarks, and promised to give the matter their "earnest consideration."

The first matter discussed this morning was the confirmation of two by-laws of Calator township. One is to close up a road allowance and the second to open a road allowance.

Reeve Lymburner, of Calator, addressed the council. The new road will save many bridges and the expense of maintenance, as well as abolishing the necessity of private bridges. The by-law was urged in response to a large signed petition, and the convenience of school children calls for the new road.

(Continued on Page 8.)

# DAIRY CREAMERY

## CONVENIENT COW STALLS.

Simple Device Which Farmers May Have for Themselves.

George E. Scott describes in Hoard's Dairyman a cow stall which bears his name. While Fig. 1 gives a perfect rear view, Fig. 2 will explain more clearly the side section and measurements.

The platform, A, is made of 1 inch oak, doubled and joints broken, with a fall of two inches, and is 6 feet 6 inches

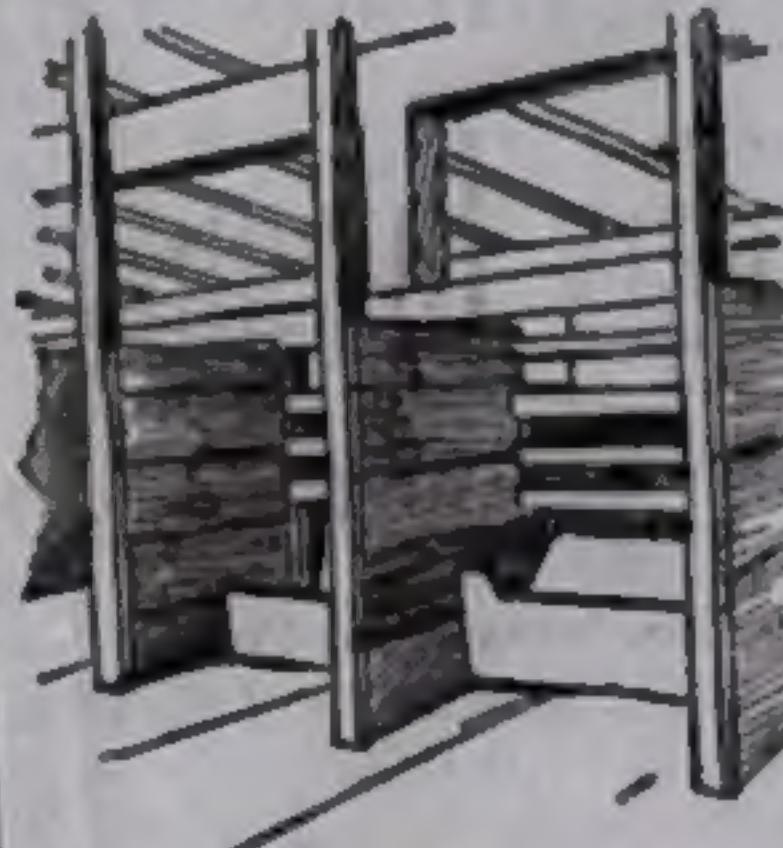

FIG. 1.  
long for a cow weighing 1,000 pounds and should be correspondingly longer or shorter as the weight of the cow may require.

This feature may be provided for by placing the fencing, in front of the cow, nearer toward the ditch or farther away, or sometimes the ditch is run at an angle or an offset at one end, but the former is by all means the most satisfactory.

The feed trough, B, is raised by running two 2 by 3 stringers the entire length of the stable, making the trough 18 inches wide and 6 inches deep in front of the cow. The stalls are 3 feet 8 inches wide from centers, and partitions 4 feet high and 2 feet 6 inches long at C. The posts, D, are 6 feet high, made from 2 by 8 studding, and toe nailed in the corner of each feed box at F and 1 by 3 lath nailed to them for the cow to eat hay through and to keep her standing back to her ditch.

The hayrack at E is 18 inches wide and 3 feet deep to F, and is open with a 6 inch thwart, so that grain, mealage or any cut feed readily falls through into feed box. The ditch is 16 inches wide and 9 inches deep on platform side and 2 inches at rear and is made absolutely water tight. The latter feature, along with the broken joints on the platform, always insures good ventilation as with every particle of manure and liquid voiding where absorbents and desodorizers can be applied puts the stable in shape so that its caretaker can keep it pure and sweet with little effort and have some place to take callers into when showing his best cows without having to prefix and suffix the visit with an apology.

Any farmer, I think, can erect this stall with the use of a good saw, hatchet, jack plane and square at a trifling cost.

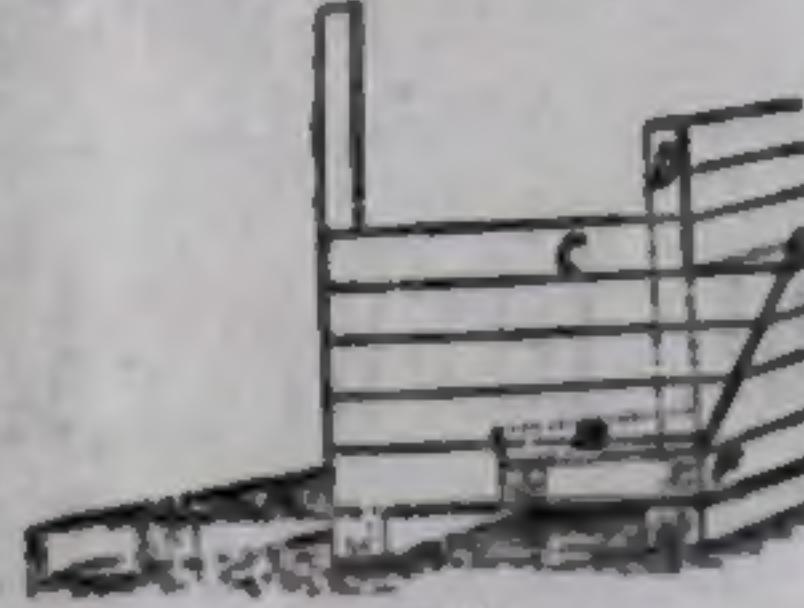

FIG. 2.

and when once completed am positive that it will be a great source of pride to the dairyman who has it in his barn.

After four years of use and keeping cows confined from four to five months each winter day and night am able to say that it is a perfect stall, and not only keeps the cows perfectly clean, but have not seen a stall that gives the cow

so much freedom for her head and body.

**News and Notes.**

Those who are interested in hybrid plums will find in bulletin No. 57 of the Vermont station descriptive and historical notes on 50 varieties, with many illustrations and other valuable information.

The department of agriculture has received a consignment of varieties of Russian grains and other products, the grains being selected with the expectation that they will resist rust and drought. All these are not for general distribution, but are to be experimented upon first at the various agricultural stations.

Gregory's Surprise is said to be among the earliest wrinkled peas.

It is said that the entire annual growth of wheat in England could support the population but 14 weeks.

Balls which when mounted and brought into contact with blue litmus paper cause the paper to turn red need lime.

Chimney soot is an obstruction to snails, and if placed thickly around hotbeds will prevent their securing entrance according to Merck.

# FRUIT & FLOWERS

## THE ART OF GRAFTING.

Advice as to the Best Season, Methods and Material.

The work of grafting can be done at various seasons of the year, after the sap has begun to flow, but, outdoors, the month of April or early May would be preferable. A writer in American Gardening, who gives this advice, says further:

The skilled grafted does as little cutting as possible and also makes a long draw cut. Three or four cuts should suffice to prepare the cion for insertion, another three or four cuts only being necessary for the stock. The loss will be slight on either stock or cion the better.

Brown Office, 657 F. St., Washington, D. C.

on such a paper one secret could readily make any necessary inquiries.

That idea did not come for some time, however, and in the meantime Beryl was troubled to know whether she ought to speak to Sir Jaffray's mother and tell her what had passed in the interview with Pierre Turrian.

There was also the further question as to Lola herself. Ought she to be told? This was a problem over which Beryl spent many hours of thought.

If there was any evil in the matter, anything which threatened Lola, not for all the world would Beryl have the news of it come through her. It would look all too much like the result of some vindictive feeling on her part.

But, on the other hand, if Beryl said nothing and it transpired afterward that the man had been to her, her silence would be open to misconception.

She resolved in the end, therefore, to go to Walcott's manor and in the course of conversation tell Lady Walcott, as it were casually, of the man's visit, giving his object as described by himself.

On her return home she did this and suggested further that it might be well to write and tell Lola of the fact.

She described the incident in a way which excited no feeling on Lady Walcott's part except laughter, and it was in this vein that the latter spoke of it in a postscript to a letter to Sir Jaffray. The letter was dispatched to await the baronet and his wife at New York, as the time was drawing near for their return to England.

It was in this way that the warning was sent to Lola that her first husband was alive and had already hunted her down.

## CHAPTER VII.

### HOW LOLA HEARD THE NEWS.

The news that Pierre Turrian was alive did not reach Lola at New York, owing to a mishap. Sir Jaffray and she arrived there some days later than they had planned and not until the evening of the day before that on which they were booked to sail.

The letters were thus thrust away to be read on board the steamer, and in the confusion the postscript was overlooked.

Had she known the news Lola would have turned back at any risk and have arranged to prolong an experience which had been the brightest of her life.

She had never dreamed that marriage with Sir Jaffray would bring the happiness to her which she had found in it. She had married him from motives which were purely worldly and selfish. She had to make a position. She loved ease and luxury. She was done with love and sentiment, and she chose a husband as a man might choose a profession, because it gave her all that she wanted with the least personal effort and difficulty.

"We women sell ourselves, and the shrewdest who fetches the biggest price," had been one of her favorite opinions, and she was glad that she had been able to marry where the man would pay so freely and where he perhaps was not undesirable.

But she had made no calculation in her plan.

She was a woman whose heart was not dead, as she believed, but rather had never been quickened into life.

She had imagined that she could go through life as a sort of unemotional lay figure by the side of a husband whom she did not love, suffering his caresses and endearments, but not returning them or at most paying with simulated affection for the comfort with which he would surround her. But in her there were no neutral tints. She must love or hate.

Sir Jaffray's nature fired her, and the more she endeavored to assure herself of her own coldness of heart the more was she moved by him. The very indifference which she affected helped to overcome her. She could not be indifferent.

He reckoned without her strength and pluck, however, and as he grasped at her she pushed him violently backward and struck him with the heavy end of her big riding whip in the face. He staggered back and measured his length on the roadway, to the intense amusement of his companion, who laughed and swore gleefully.

When he got up, the ruffian, red with rage and swearing that he would have revenge, approached Lola, who awaited his attack with unflinching courage, eying him steadily the whole time. Rendered cautious by his first dash, he held off for a moment watching his opportunity, and then with a cunning feint to put her off her guard and rushed in, pinioned her arms and held her.

She struggled to free her hands, but the fellow's sinews were too much for her, and she was beginning to fear that he would overpower her when she heard him vent a hoarse, guttural, choking sound and saw that Sir Jaffray had come up and caught him by the throat, half strangling him in his fierce temper. The next instant the man was on his back again in the roadway, flung there with great violence by her husband.

"Are you hurt, Lola?" he asked, with the pain of surprise in his eyes.

"No, not in the least. Come away. That brute's getting up again."

The fellow was on his feet again directly, and both he and his companion had drawn their revolvers.

"You don't shoot women in these parts, do you?" said Sir Jaffray sternly.

"Wait. Come, Lola."

He led her away to a house that was open at some little distance, and, putting her inside, told her to wait.

"You mustn't go back, Jaffray," she said, a fear that she had never felt for herself awaking on account of him, and she clung to him to keep him by her.

"Don't be afraid," he said kindly, and, putting her hand off his arm with a firm, gentle strength, he went out again. He walked straight up to the wily who had assaulted Lola, and, regarding contemptuously, she regaled

More than all, however, he was a man born to be loved by women—strong

so commanding were strength was needed, gentle as a child where gentleness served, as brave as a man can be and courteous to the point of long suffering. In all bodily exercises he was exceptionally agile and enduring, and he possessed in a marked and extraordinary degree just those qualities which to Lola were the type and embodiment of manhood.

She was bound to yield in time to the forceful influence which he exercised, and the more she perceived this and struggled against it the more irresistible did she find it.

As her feelings softened so her fears waned. She was afraid to grow to love him, because she saw all the dangers of it to her.

One thing she had learned clearly about her husband. With all the stubborn tenacity of his race he held the honor of his name and family as high as a religious creed and perhaps higher. Straight dealing was an instinct and deceit and treachery an abomination. She had seen 50 instances of this in the months of the honeymoon, and she was shrewd enough to understand that the deceit which she had practiced he would punish remorselessly and visit with implacable unforgiveness if he ever discovered it.

His faith once given was given absolutely; once betrayed, was withdrawn forever.

She did not care while she knew that the tie between them was on her side one of tongue and not of heart. She knew, of course, that in the future, whether Pierre reappeared or not, she would need a clear head and calm judgment to walk safely, but if she grew to love her husband she would be neither clear in head nor calm in judgment.

So long as she could part from him, if all were discovered, without any loss except such as touched her social position and her money interests, she felt that she could go through all with the certainty of ultimate success.

But if she loved her husband there were thousand and one complications which might follow, each of which would be a source of anguish.

It was no trouble to her to feign love, to school herself to seem happy in her husband's presence, to be bright and cheerful with him and to shower upon him a hundred attentions which seemed to please, but were in reality the more shrewdly chosen because a clever calculation prompted each and all.

Gradually she was surprised at the ease with which this acting was done and the pleasure which it seemed to give her in the doing, nor did she guess the real source of the pleasure until an incident which happened when they had been away some two or three months revealed the truth to her.

They had ridden into a far outlying town in one of the southern states, and Lola was standing in the street alone waiting for her husband, who had been detained at the place where they had stabled the horses. A couple of drunken rowdies passed, and, noticing her beauty, stopped and spoke to her. She took no notice except to glance at them with so much contempt in her expression that one of them lost his temper and, with a deep oath, tried to clutch her by the wrist, vowing he'd kiss her for her insolence.

He reckoned without her strength and pluck, however, and as he grasped at her she pushed him violently backward and struck him with the heavy end of her big riding whip in the face. He staggered back and measured his length on the roadway, to the intense amusement of his companion, who laughed and swore gleefully.

When he got up, the ruffian, red with rage and swearing that he would have revenge, approached Lola, who awaited his attack with unflinching courage, eying him steadily the whole time. Rendered cautious by his first dash, he held off for a moment watching his opportunity, and then with a cunning feint to put her off her guard and rushed in, pinioned her arms and held her.

She struggled to free her hands, but the fellow's sinews were too much for her, and she was beginning to fear that he would overpower her when she heard him vent a hoarse, guttural, chocking sound and saw that Sir Jaffray had come up and caught him by the throat, half strangling him in his fierce temper. The next instant the man was on his back again in the roadway, flung there with great violence by her husband.

"Are you hurt, Lola?" he asked, with the pain of surprise in his eyes.

"No, not in the least. Come away. That brute's getting up again."

The fellow was on his feet again directly, and both he and his companion had drawn their revolvers.

"You don't shoot women in these parts, do you?" said Sir Jaffray sternly.

"Wait. Come, Lola."

He led her away to a house that was open at some little distance, and, putting her inside, told her to wait.

"You mustn't go back, Jaffray," she said, a fear that she had never felt for herself awaking on account of him, and she clung to him to keep him by her.

"Don't be afraid," he said kindly, and, putting her hand off his arm with a firm, gentle strength, he went out again. He walked straight up to the wily who had assaulted Lola, and, regarding contemptuously, she regaled

### WORDS OF PRAISE FOR A GRIMSBY BOY.

Wilfred Lucas in St. John's, Newfoundland.

(St. John's Herald.)

That the St. John's people know how to appreciate a really good thing when it comes in their way, was evidenced by the large and delighted audience which filled the College Hall last night, a significant fact being that it was mainly composed of the same people who attended the previous concert a week ago. Personally, we have to thank Mr. Wilfred Lucas for a real musical treat, a pleasure which so rarely falls to our lot in this out-of-the-way corner of the world. We will not attempt to criticize the artist from a musical standpoint, as it would be presumption on our part to do so. But, that Mr. Lucas is an artist in the truest sense of the word, and one in which there are still larger possibilities, he proved in his finished rendering of any song he undertook.

That one man can hold an audience spell bound for two hours without showing the least sign of fatigue or failing, &c., and send that audience away wishing for more, is little short of a genius! We have heard more powerful baritones than Mr. Lucas, but none who rendered more intelligently the spirit of the music and words. It is this insight into the mind of the composer that lends to any music its greatest charm. And when the singer adds to this, the gift of a sweet and sympathetic voice, the effect is perfect. Whether the song were grave or gay, classical or otherwise, Mr. Lucas was alike excellent in all.

The absence of effort in his singing was another very agreeable characteristic. Many singers, and good singers too, seem to think the more noise they make and the harder they work to make that noise, the better. This, in our humble opinion, is not music at all, nor in the least enjoyable. Mr. Lucas is also a very clever reciter, and his imitation of the Irish and French-Canadian dialects were faultless, as were also those of his gifted father, Dr. Lucas, in his rendering of the "Northern Cobbler," &c. The accompaniments, so exquisitely played on organ and piano, by Mr. P. LeSueur, must have greatly helped the singer. We wish to thank Mr. Lucas before he leaves us, for those gems of song he recited to us so liberally, and to assure him of a warm welcome if fortune should ever waft him to our shores again.

### We Fooled the Surgeons.

All doctors told Renick Hamilton, of West Jefferson, O., after suffering 18 months from Rectal Fistula, he would die unless a costly operation was performed; but he cured himself with five boxes of Buckle's Arse Salve, the surest Pile cure on Earth, and the best Salve in the World. 25 cents a box. Sold by all Druggists.

Sold by Murray Fish, Grimsby.

The department of agriculture has received a consignment of varieties of Russian grains and other products, the grains being selected with the expectation that they will resist rust and drought. All these are not for general distribution, but are to be experimented upon first at the various agricultural stations.

### Saltfleet Council.

The Saltfleet council met in Squire's hall as a court of revision and for general business, on Monday, June 5th, 1899. The most important matter before the council was Saltfleet municipal swamp drain. About fifty ratepayers gathered in the council chamber at 3 o'clock to discuss the engineer's report on the swamp drain. Free discussion was allowed and for about two hours there was a pretty lively time. There are only about five or six people who are taxed for benefit, according to the engineer's report, and all the others are taxed for "injuring," or in other words, for running water on to the benefit parties. Consequently, the large number of ratepayers who are taxed for "injuring" are kicking against the drain being put through. The council listened patiently to the arguments pro. and con., and then passed a resolution laying the matter over.

In the court of revision several dogs were struck off and various changes made in the assessment roll.

The H. G. & B. Electric Ry. Co. appealed against their assessment as being too high. Mr. Dickson, of Gauld & Dickson, and Mr. Nelles, manager of the road, appeared before the court and claimed that the power house, etc., at Stoney Creek, should be assessed as "old scrap." The court dismissed the appeal.

Samuel Lee appealed against his assessment of \$1200.00 on personal property. The assessment being made on cash and notes.

Moved by Galbraith, seconded by Glover, that the income from farm property be not taxable for 1899. Carried. Ptolemy voting nay.

Several accounts were passed.

E. D. Smith and 10 others presented a petition asking the council to enlarge the outlet of the Saltfleet swamp drain across lots 4 and 5.

Moved by Galbraith, seconded by Dewar, that the petition of E. D. Smith and 10 others be received and adopted and the reeve be and is hereby authorized to take such action as he may deem necessary in the matter.

### When the Whistler Blows

it is a signal that the train is coming, and if you don't get off the track it will run over and kill you. When you cough, it is a signal that consumption is coming, and you had better look out. The way to stop consumption is to stop the cough. The way to stop the cough is to take Shiroki's Cough and Consumption Cure—25 cts., 50 cts. and \$1.00 a bottle. Your money refunded if it fails to cure.

### BLACKLEG.

#### Expert Opinion on Its Prevention and Treatment.

The veterinary department of the Kansas experiment station in a bulletin just issued says that blackleg in cattle is caused by the blackleg bacillus and by no other germ. On the other hand, the blackleg bacillus causes blackleg and no other disease. By controlling this bacillus we would have one solution of the question of prevention. Blackleg is a wound infection disease—that is, it is produced by infection through a wound, by the entrance of the blackleg bacillus through a wound into the body tissues. This wound may be in the skin or in the mucous membranes of the digestive tract (mouth, stomach, intestine).

Blackleg bacilli are found in two places—in the bodies of dead or diseased blackleg victims and in certain low, damp soils, usually bottom lands. In both places these germs grow and multiply. Infected soil, or food plants grown on such soil, serve as means to carry the germs into the animal's tissues. Wounds or bruises in the animal's skin or digestive membranes, be they ever so slight, serve as ports of entrance for the bacilli. The hoofs of animals and their coats of hair, even their droppings, carelessness in attendants, serve to carry the germs from place to place. These statements point out two possible methods of prevention:

First.—Changing animals from infected fields (usually low places with rich soil) to noninfected grounds (high, dry places).

We can further prevent the spread of the disease by burning the dead bodies of animals that died of blackleg, avoiding the practice of burying such carcasses, which amounts practically to planting the disease germs for future harvests.

Second.—The disease can in a measure be prevented by proper feeding—feeding digestible grasses and root crops, avoiding rough cornstalks and other coarse, hard foods which can produce small internal or external wounds or abrasions, and thus provide a port of entrance for the disease germ. The germ always enters the body through a wound. Nursing calves do not have these opportunities for wounding their delicate mucous membranes, and it is a well known fact that they are rarely afflicted with this disease.

### A Point in Potato Planting.

I wish to put myself on record as advocating the exact opposite of what I ever saw printed before in regard to the subject of the selection of smooth eyed potatoes for seed. Now, the features of the eyes of a potato are the characteristics of the type or variety when originated, and when the potato begins to run out, through various causes, the eye always gets smoother and smaller, never larger; hence select the tubers with the "stem" eyes protruding and the eyes of the middle and main seeded eyes that show a bulge beyond the eye—that is, toward the stem end. Any tendency toward coarseness will be eradicated under ordinary field culture and the use of small seed, as many are compelled to use. If your field selection has been large enough, you may use the smooth and medium sized stock for crop purposes with excellent results, using the best specimens only for seed propagation. The protruding stem and eyes will give best results if four or five ounces are secured, but if there should be more than one eye to three ounces cut the poorer one out, as the above class of eyes will throw several original stalks. The indented eyes in the middle and toward the seed end are generally single stalk producers, and two eyes may be used, clipping out extra eyes if less than five ounces. Use no small pieces in any case.

—Prairie Farmer.

## South Shore Navigation Line

—RUNNING BETWEEN—

Grimsby Park, Jordan Beach and Toronto

—PER—

Steamer Tymon

—COMMENCING—

June 12th, 1899

Double Trips Daily.

Time of Trip.

Commencing—leaves Grimsby Park for Toronto 6:45 a.m. and 3:00 p.m., returning leaves Toronto at 10:00 a.m. and 8:15 p.m.

Leaves Grimsby Park for Jordan 1:00 p.m. and 11:15 p.m., returning leaves Jordan 6:00 a.m. and 4:00 p.m.

Steamer leaves Toronto Wednesday and Saturday at 2:00 p.m., running to Grimsby Park, then to Jordan Beach, and from there direct to Toronto. Steamer will not return Saturday night, but will leave Toronto at 11:30 p.m. for Niagara, Queenston and Lewiston, N. Y., making connections for Niagara Falls and Buffalo, N. Y. Steamer will leave Lewiston, Queenston and Niagara for Jordan Beach via Toronto, arriving at Jordan Beach in time to leave Jordan Beach Monday morning at 6 a.m.

Fares.

From Grimsby, Beamsville and Jordan Beach to Toronto

Single Fare 75c. — Return Fare \$1.00

The above rates from Grimsby and Beamsville include railway fare on Hamilton, Grimsby and Beamsville Electric Ry. to Grimsby Park, also coupon ticket admitting holder free through Park one hour before departure of boat.

BOOK TICKETS.

10 Round Trips to Toronto and Return \$5.00.

These Tickets have coupons attached which permits holder to enter Park one hour before departure of boat.

SPECIAL SIDE TRIPS.

On Monday, Tuesday, Thursday and Friday—leaves Grimsby Park for Jordan Beach at 1:00 p.m., arriving at Jordan Beach at 2 p.m. Leaving Jordan Beach at 4 p.m., arriving back at Grimsby Park 4:45 p.m. This trip will be a popular afternoon sail. Return fare, including coupon, admitting holder to free admittance through Park 25c

### MOONLIGHT TRIPS

To Toronto and Return Monday, Tuesday, Wednesday, Thursday and Friday.

Leave Grimsby Park at 5:00 p.m. Arrive at Toronto at 8:00 p.m. Leave Toronto at 8:15 p.m. Arriving at Grimsby Park 11:15 p.m.

Return Fare for Round Trip 50c.

This rate will include H. G. & B. Electric Ry. from Grimsby and Beamsville and admission through Park one hour before departure of boat.

Efforts will be made to induce the H. G. & B. Electric Ry. to run cars from Grimsby and the Park to connect with the early and late boat.

## Lola Crawshay

(Continued from Fifth Page.)

when the man said threateningly, struck him with his clenched fist a fearful blow in the face, knocking him down with a thud which resounded all across the road. The man lay like a stunned ox. Then Sir Jaffray turned to the companion, but he, seeing what had happened, fired his revolver at random and ran away, swearing.

When Sir Jaffray went back to Lola, he found her more agitated than he had ever seen her, and she did not even herself again for many hours and indeed for days afterward.

He did not understand the cause of it all.

In that instant the revelation had come of the new feeling which was developing in her, and the knowledge, in view of all that it meant, had agitated her as much as any incident in all her turbulent life.

In the days that followed, Sir Jaffray noticed for the first time in his wife a waywardness and uncertainty of temper which were quite unusual, and they surprised and rather grieved him. She was in reality fighting against her new emotions and striving resolutely to conquer them.

But she fought in vain, and from that moment onward she felt herself drawn closer and closer to him until she ceased at last to wage a useless fight.

Her return to England was thus welcome. So long as they were thousands of miles away from Europe she was safe against discovery, and could she have had her way she would have prolonged their journey indefinitely.

But Sir Jaffray was beginning to feel a strong desire to be home. He loved the place and longed to be there and to see Lola installed as its beautiful mistress. He would have hurried home earlier had he followed his own inclinations, but he could not interfere to stop the pleasure which she showed on every occasion in all the incidents of their traveling. He was delighted, however, when at length he stood with Lola on the big Atlantic liner and watched the lighthouse at Sandy Hook growing dimmer and dimmer in the haze of distance and felt that they were homeward bound.

He was surprised that Lola was silent and thoughtful.

It was a new thing for her to feel foreboding.

But now if what she had begun to dread came true she felt half-hesitant to grapple with it. And it was part of the effect of her new love and the fears it bred that the danger which, when she did not dread its coming, had seemed remote and all but impossible now appeared almost certain and inevitable. She blamed herself for not having taken any of the thousand precautions at the time of Pierro's death which she now saw the ought to have taken, and her father's words recurred to her over and over again:

"You did not see him dead." How she wished she had.

Sir Jaffray rallied her once or twice when he caught her brooding apparently.

"Beginning to think what a serious matter marriage is?" he asked. "You'll have no end of fuss made of you in the country. Different from the wild west."

"I suppose one is quizzed a bit," said Lola. "But I know most of the people, and I can manage them, I think."

"Not much fear of that," replied her husband, with a smile of admiration. "There are not many people you could not manage. We shall have to have a function or two, and there'll be a bit of fuss when we get back, I expect. But we won't stay longer than you like at the manor. We'll get up to town. We shall have to go about a bit, you know."

"Yes, marriage isn't an excuse for refusing invitations, as it used to be in Galilee. It makes one look out for them rather."

"There won't be much looking out for them, I promise you. When once you're seen, they'll come fast enough."

"I suppose so, but I'd rather have our time back there," with a movement of the head toward the west, "than a London season."

"You'll grow out of that fast enough," he said. "But I'm glad you haven't been bored. After all, there's no place like the manor, to my mind. I'm awfully fond of the old place, and on my word I go back to it with greater gusto every time I've been away."

Then, after a long pause, he added, "I shall like it better than ever with you at its head, Lola, and I think you'll get to feel about it pretty much as I do."

"I shall, if you make it a pleasant place to me," she answered, with a laughing look of affection. "If not, I shall hate it."

"I'll try not to make you do that. I shall be glad when we get there. We're due in tomorrow afternoon, and if all goes as it has hitherto we shall be well up to time. We shall be home before midnight, all being well. I'm afraid that our getting in at such a time will upset any arrangements which the Walcott people may have made for a reception, but we must have 'em up next day and give 'em a lunch or a feed of some kind. Wonderful care for disappointment is a good feed. Jove, I shall be glad to see the old place again!"

That night, the last they were to spend on board, the baronet went up on deck to smoke a cigar after supper, and Lola went with him. It was a clear, crisp, sharp air, and the moon and stars were shining brightly. She took his arm, and, pressing closely to him, walked up and down the deck.

"Our last night at sea, Jaffray," she said.

"And a lovely one, eh?"

"Have you enjoyed the time?" "Never had a better in my life," he answered enthusiastically. "Didn't know marriage was half so good."

"Or you might have tried it before?" And she laughed.

"If I'd met you before," he replied, like a lover.

"I'm glad I've given you one span of happiness, Jaffray," she said, and the tone in which she spoke seemed rather sad.

"It seems to have changed you a good bit," he said. "You're not like the same girl in some ways."

"Not with you?" She put the question in a tone that touched him at once. "I'm the same with you. You forgot that till you came into it mine was a fighting life."

"So that chap must have thought in Calladus," he said, laughing at the recollection of the way she had treated the man who had tried to insult her.

"But you had to come to the rescue then. I wonder if you always would and will."

"We don't breed cowboys in old England," he answered.

"True, but there are other villains. Do you believe in omens, Jaffray?" She put the question impetuously.

"Yes, of a kind," he said. "When I've been hunting big game, for instance, and missed at the first shot, I always took it for an omen that if I didn't hit with the second I should have a bad time, and I took good care not to miss, I can tell you."

"Oh, I don't mean things you can avoid."

"Then I don't believe in any other. Bad luck doesn't begin with a man as a rule till he's made a mess of things for himself."

"Yes, but I mean if you fear something's going to happen?"

"But a man doesn't fear that until he knows there's something that can happen. A man who walks straight isn't afraid of tumbling into the ditch at the roadside. But once I had a premonition, by the way, and it came true," he added after a pause.

"What was that?"

"When I saw you that day in the little woman's home, I had a presentiment that you would be my wife, and here we are."

He laughed pleasantly and pressed her arm, and she thought it wiser to say no more about omens after what he had said.

Their arrival at Walcott manor was necessarily very quiet. They reached Liverpool in the afternoon of the following day, and as soon as the baggage could be got together started for home.

Lady Walcott had remained in the house by Lola's special wish—despite the results of the change in her feelings—and Lola did her utmost to follow up the kinder letters she had written with

a greeting of really affectionate warmth.

But the old lady had not changed on her side, and, though resolved to set up to the promise she had made to Sir Jaffray before the marriage, she did not like the woman he had chosen and would not pretend that she did.

Thus the homecoming was chilled on the threshold, and Lola herself was both disappointed and irritated, and there was more of the old Ishmaelitish feeling of defiance in her manner than her husband had observed since the marriage.

With Jaffray himself his mother was all tenderness and love, but she felt the change in the position.

It was the first time that he had come home from any of his wanderings when she herself had not had the first place in his thoughts. If the other woman had been Beryl, she thought, it would have been tolerable, but to give place to Lola was unbearable.

She staid with them for a long time while they talked to her of their travels, and she listened attentively.

"You have been a good correspondent, Jaffray—better than usual, I think." The baronet had thoughtfully made a point of writing much more frequently than he had been accustomed to write on former occasions. "The letters from you both have been most bright and interesting. You have had all mine, I suppose?"

"Yes, I think so. We got the last batch at New York."

"And what is your theory of the five stringed violin enthusiast? Is he a lunatic? He has been here and was most impatient to know when you would be back."

"Five stringed violin?" exclaimed Sir Jaffray. "What do you mean?"

"There, you haven't read my letters. I told you about him and his queer visit to Beryl."

"Who is he? What is he? I must have missed it."

"The foreign violin player, M. Pierre Tertian, who has a theory about violins."

"Jaffray, I think I'll go, dear. I'm dead tired," exclaimed Lola, rising the instant Lady Walcott finished. "We must have all the home news in the morning," she added, with a smile.

So it had come already, she thought as she went away, with a great pang at her heart, but making no outward sign.

at any time.

### CHAPTER VIII. FACE TO FACE ONCE MORE.

That night was one of the hardest in Lola's life, but she faced the crisis with all the strength of her most courageous character and came out of it undaunted and determined.

So great was her self mastery and so strong her powers of acting that Sir Jaffray did not detect a single symptom of the struggle which absorbed her.

Through the night she lay awake, never moving, lest she should wake him and so disturb her own opportunity for thought, and perhaps awoke his suspicions that something was amiss.

There were two courses open to her. One was to tell Sir Jaffray at once the whole matter and trust to his love for her; the other was to face it out and dare the man she hated to do his worst.

If the man at her side had been different, if his sense of honor and morbid fear of the suspicion of disloyalty had been less acute, she would have told him all and trusted to her love to win him to cling to her through the publicity and scandal which would inevitably follow when Pierro was set at defiance.

But she dared not.

She knew that Sir Jaffray, with all the influences that were round him, the strong love of truth that dominated him, the capacity to suffer rather than be touched with a taint of disloyalty, would put her away from him at once, and probably he would never see her again.

The alternative was to face the other man and dare him to do what he pleased.

What would he do?

There was that scene on the Devil's rock, but there was no proof of what she had done. Besides, if there were, what did it matter? If she was to be dragged from the place to which she had climbed, what did it matter how far she fell? A little deeper would make no difference.

Need she fall at all? That was the question.

She knew Pierro well, had seen through and through his sordid little soul, and could count up easily enough the price that would buy him. Comfort, ease, luxury, money for his vices—these were his ambitions, and she could satisfy him. Sir Jaffray had settled on her an ample dowry, and she could easily get more money if she wanted it.

She would go through with it, face it as she had faced her troubles and fought them down, and so great was her fighting instinct that, though she knew the whole happiness of her life would be at stake, the excitement of the prospect was not altogether unpleasing.

In the early hours of the morning she fell asleep, and Sir Jaffray, waking in the gray light, found her sleeping quietly and peacefully, with a slight flush tinting her cheeks such as he had seen when she was excited and pleased.

When she went down to breakfast, she was quite herself—alert, vigilant, resourceful, high spirited and suggestive of strength of will and purpose that Sir Jaffray noticed it and was pleased.

He put it down to her being at home at the manor.

"Seems to have done you good to get home, Lola," he said. "You're not the same woman you were on the boat. Where are your omens?" He smiled.

"Where, indeed?" she replied, laughing back. "I'm afraid I must have been upset by the voyage. Perhaps I thought I was going to be shipwrecked. But I'll be safe here, eh?" There was more in her words than he understood.

"You ought to be if anywhere," he answered.

"Even if I manage to offend the very great personages who come here?"

"You won't do that. People aren't easy to take offense with Walcott."

"Where's the mother—Lady Walcott? I suppose I may call her mother!"

"She's not coming down to breakfast. She's not used to our wild west early rising. Besides, she was up late. She'll be down to lunch."

"Did you sit up late? I was horribly tired. I couldn't stay. What was that

she was saying about some ridiculous spindrift or other and a five stringed violin?"

We have the largest and brightest store in the city; also our stock is made by the best makers in the Dominion and the prices to suit any purse. Give us a call. Every person is welcome whether they buy or not.

Ladies buttoned and laced Shoes \$1.00, \$2.00, \$2.50 to \$3.00.

Gents' tan and black Shoes \$1.75 to \$5.00.

Boys' Shoes \$1.25 to \$2.25.

Youths' Shoes 65¢ to \$1.25.

The natural exuberance of youth often leads to recklessness. Young people don't care for themselves, get over-heated, catch cold, and allow it to settle on the kidneys. They don't realize the significance of backache—think it will soon pass away—but it doesn't. Urinary Troubles come, then Diabetes, Bright's Disease and shattered health.

A young life has been sacrificed. Any help for it? Yes!

### DOAN'S KIDNEY PILLS.

These conquerors of Kidney Ills are making the rising generation healthy and strong.

Mrs. G. Orman, 146 Adelaide St., London, Ont., says:

"My daughter, now 13 years old, has had weak kidneys since infancy, and her health on consequence has always been poor. The boxes of Doan's Kidney Pills have removed every symptom of kidney trouble, and restored her to perfect health. I am truly thankful for the great benefit they have conferred upon her."

38 King St. W. 4th door east of McNab street.

HAMILTON.

## Destiny Changed.

The "Slater Shoe" is closely watched during the process of manufacture. Every shoe undergoes a careful examination after leaving the hands of each operator.

The slightest flaw in the leather or workmanship—a stitch missed—a slip of the knife, only discernible to an expert, condemns the shoe that started toward the "Slater" goal to the ordinary,

nameless, unwarranted army of footwear sold to whoever will buy them.

The "Slater Shoe" is made in twelve

shapes, all leathers, colors, widths, sizes

and styles. Every pair Goodyear Welted, name and price stamped on the soles.

\$3.50 AND \$6.00.

J. C. FARRELL, Sole Agent for Grimsby.
